
Confidence Rating Matrix

| Topic | My Prior Knowledge (1–5) | Chatbot Clarity & Feedback (1–5) | Confidence in Presenting to the Given Audience (1–5) | Total (Out of 15) |
|----------|-----------------------------|----------------------------------|--|--------------------------|
| Topic 1: | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Topic 2: | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Topic 3: | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

How It Works

Students fill in this matrix **after completing their chatbot interactions** with all three of their topics (basic, intermediate, advanced). For each topic, they rate themselves on:

1. **My Prior Knowledge (1–5):**

How much did I already know about this topic before I used the chatbot?

- 1 = I knew almost nothing
- 5 = I could teach this confidently without help

2. **Chatbot Clarity & Feedback (1–5):**

How clear and helpful were the chatbot's responses on this topic?

- 1 = Vague or confusing, did not help much
- 5 = Very insightful and useful in building my understanding

3. **Confidence in Presenting to the Given Audience (1–5):**

Considering my knowledge and the audience type, how confident do I feel in delivering a presentation on this topic?

- 1 = Very unsure, would avoid it

- 5 = Very confident, seems like a perfect fit

Students then calculate the **total out of 15** for each topic.

Follow-Up Prompt (Written Reflection)

After completing the matrix, students must write **4–5 lines** answering the following:

“Based on my chatbot interaction and the confidence matrix, I have chosen Topic _____ for my presentation. I believe this topic is the best fit because _____.”
